Greetings all,

Our stakeholders at 6171 Century Blvd. have raised a concern about flooding problems on Century Blvd. and 98th Street.

They would like to make sure that LAWA and/or the Los Angeles Bureau of Street Services address the flood control or drainage issues for the streets that are leading into and out of LAX facilities.

Please let me know if or how the current flood control systems are being updated. Would this be part of the LAMP project, Streetscape project or other infrastructure improvements.

Thank you,

Laurie Hughes

Subject: Re: Rain impact on LAX area

Hi Omar,

The rain expected tomorrow morning through the evening could cause flooding on Vicksburg and Century similar to what occurred a few weeks back. As I mentioned in my previous email, we were personally impacted with water getting into our data center. Additionally, the high water levels presented unsafe conditions for cars driving in and out of LAX.

Would it be possible to provide us with an update today on how the city is planning to respond to the heavy rain starting tomorrow morning in the LAX area?

Thank you for your help!

Remmie

Remmie, by way of this email, I am forwarding your observations to our Council Office to notify them of the flooding problems.

Given the amount of rain that we experienced over the weekend, my guess is that the drainage system was simply overwhelmed.

I will ask our staff to check the drains for any debris that might be blocking the water flow.

Hi Laurie,

Due to the rain this weekend, water flooded Vicksburg, at times covering our sidewalks, and Century Blvd was practically a river. Additionally, the water couldn't drain quickly enough, so it started to get into our data center.

Have you received any updates on what failed that caused this

flooding? Are DOT or public works doing anything to remediate? We would like to partner with you to advocate for the required improvements.
